Walter's
PFLEGEHAND®

innovation in personal hygiene

Wellness and care for the whole body

Who would not like to take care of his body with pleasure and enjoy the feeling of wellness and fitness every day? Whether in the bath, in the sauna or at the beach.

With **Walter's PFLEGEHAND®** and his unique nursing components it can be realized.

Body treatment and personal hygiene can be child's play. The secret lies in the simple use of nursing hand-components:

Universal wooden handles allow the trouble-free achievement of all body parts. They are available in three variations and are treated with Bio-Natur-Hartöl. The standard execution is 42 cm long (the extended version 57 cm). The universal handle 'curve form' adapts itself especially to the back treatment.

All nursing components can be easily applied to the respective universal wooden handles by an easy change system (velcro fastening).

The patented, tested, nursing cushions are made from a humidity-thick, latex-free special foil.

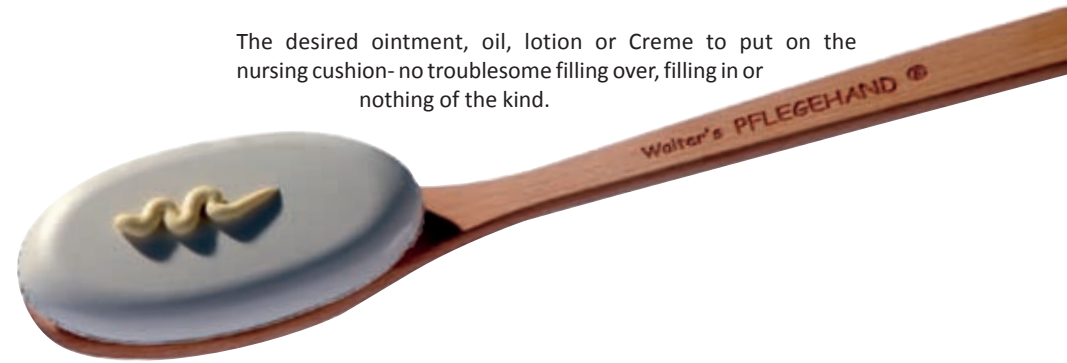

You can apply body lotions or medical ointment on the whole body, without strange assistance.

After the application, the cushion is simply cleaned with hot water or customary detergents and is hygienically clean again.

The nursing components:

- **Nursing cushions**
Available in the original form or the V formation. It is innovative and proves itself for lotions and medical products
- **vSponge**
for washing and easy massaging
- **Brush**
with clinically clean nylon bristles. Can be used as dry brush or wet brush, also in the sauna
- **Foot and Toe Cleaner**
for easily cleaning, drying and putting on lotion between your toes
- **Massage scooter**
can be used together with the handle or the hold tape, as well as put on the floor and used to massage your soles
- **Callus file**
consists of a fine and a rough surface which is replaceable by a double-sided adhesive tape
- **Mirror**
in connection with the universal wooden handle, is suited to control your soles without strange assistance. Especially suitable for diabetics
- **Adjustable hold tape**
it allows you to carry the complete nursing system in your hand without using the universal wooden handle
- **Wall fixture**
It is possible to attach a wall fixture without having to drill. Once attached, all nursing components can be kept handy

The desired ointment, oil, lotion or Creme to put on the nursing cushion- no troublesome filling over, filling in or nothing of the kind.

- Predicate »Recommendable«
