

# TOKIO LED BRIGHT

---

The new features of the Innolux Tokio desk lamp now include a bright light (2700–6500 K). From the control panel you can select the setting you want: work, reading, coffee break or sleeping. You can also change the direction of the light, since the lamp dome can be turned in different positions. The USB charging port integrated in the luminaire body allows to charge your phone effortlessly.

## Technical information
